Grade	**10.00** out of 10.00 (**100**%)

Question 1 | Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using the counter method.

```
void function (int n)
{
    int i= 1;
    int s =1;
    while(s <= n)
    {
        i++;
        s += i;
    }
}
```

Note: No need of counter increment for declarations and scanf() and count variable printf() statements.

Input:

A positive Integer n

Output:

Print the value of the counter variable

For example:

Input	Result
9	12

Answer: (penalty regime: 0 %)

Reset answer

```c
#include<stdio.h>
int main()
{
    int n;
    int i = 1;
    int s = 1;
    int count = 0;

    scanf("%d",&n);
    count++;
    count++;

    while(s <= n)
    {
        count++;
        i++;
        count++;
        s += i;
        count++;
    }
    count++;

    printf("%d",count);

    return 0;
    }
```

	Input	Expected	Got	
✔	9	12	12	✔
✔	4	9	9	✔

Passed all tests! ✔

Correct

Marks for this submission: 1.00/1.00.
